

The **REVERSIBLE WRINGER** is an important feature. Clothes may be wrung while the washer is being operated, with no loss of time. No necessity for a swinging wringer with its complicated gears and levers—the **JOHNSON** can be easily moved, making the wringer accessible at all times.

The **JOHNSON** is the most economical machine on the market; our experience shows that the repair parts sold, including the labor charge, does not average **FIFTY CENTS** per year. Hundreds of **JOHNSON'S** in use eight to ten years without one cent expense.

**EVERY JOHNSON OWNER A BOOSTER—
ASK THEM**

SAFETY FIRST — SANITARY

The **JOHNSON**, equipped with special gas burner, heats the water and boils the clothes in the machine while washing, insuring the most efficient and sanitary cleansing known to laundry experts. Where gas is not available, a Coal Oil Burner can be furnished at a small extra cost. However, the **JOHNSON** can be used without any burner attachment equally as well as any other electric washer.

Capacity of tub is about 22 gallons of water, and holds about twelve shirts or fifty towels. It will do the entire washing, boiling and wringing for a family of six in less than one and one-half hours, or in about one-sixth of the time required by hand methods.

GUARANTEE

A guaranteed bond is furnished with each machine, guaranteeing its construction and ability to wash and wring all kinds of clothes and that the cost of electricity will not exceed 1½c per hour.

LIBERAL FREE TRIAL

THE JOHNSON WASHER will be sent to your home on free trial, to verify every statement we make, and if it does not meet with your highest approval you will be under no obligations to buy or pay one cent for same. This liberal inducement should prompt your careful consideration. Why pay more when a **JOHNSON** does the work?

Johnson Electric Washer

SAVE

LABOR, TIME, CLOTHES
HEALTH, MONEY

AND BEST SERVE YOURSELF and YOUR HOME

A FEW SUPERIOR FEATURES OF THE JOHNSON ELECTRIC WASHER

1st—Equipped with special gas burner which boils and sterilizes the clothes in the machine while washing. A length of metal gas hose with each machine.

2nd—A California product—service unequaled.
Made in Oakland.

3rd—Has strong channel steel legs that permit our adjustable attachment to the machine—should change of height be necessary.

4th—The tub is made of solid copper, the most durable metal known for washing machines; will never warp, leak, rust or burn out.

5th—The Johnson Electric Washer is compact, and simple to operate, having only one lever. Any child can operate it.

6th— $\frac{1}{6}$ H.P. Westinghouse Waterproof Motor, of the new inclosed type, especially adapted for washing machines. Electric cord and attachment plug free with machine.

7th—Power transmission gears completely inclosed, run in grease and oil, which insures easy, noiseless running and extreme durability.

8th—This machine is easily filled and drained, a special Johnson feature. A piece of hose is furnished to convey water into the washer; same hose can also be connected to the drain faucet for emptying tub, thus eliminating the heavy lifting and carrying of water.

9th—Its sales far exceed those of any other make of electric washers in this territory. There is a reason. The price, quality of material and workmanship is right.
